

WISDOM LUCKY

Frontend Developer

Losagie555@gmail.com | github.com/osagi3

PROFESSIONAL SUMMARY

Skilled and results-driven Frontend Developer with over 3 years of experience building high-performance, scalable web applications. Expert in React, Next.js, and modern JavaScript/TypeScript development. Adept at building intuitive UIs, integrating APIs, and optimizing for performance and accessibility. Strong team collaborator with a proven track record delivering production-ready software in agile environments.

SKILLS

Languages & Technologies: HTML, CSS, JavaScript, TypeScript, Next.js, React, Tailwind CSS, Git/GitHub

EXPERIENCE

KDN — Frontend Developer

- Built the complete frontend UI and core functionality for GHRI (Global Health Reform Initiatives), a global healthcare platform dedicated to transforming healthcare access and outcomes worldwide.
- Developed responsive, accessible interfaces connecting patients with qualified healthcare professionals, enabling seamless doctor-patient consultations.
- Implemented health awareness, volunteer participation, and community support features to advance global healthcare reform initiatives.
- Owned the frontend build end-to-end with React and Next.js, from component architecture through deployment, delivering a scalable, production-ready platform.

PROJECTS

AlphaStock

Real-Time Investment Community Platform

- Integrated real-time stock updates using Server-Sent Events (SSE) to stream live market data efficiently without client-side polling.
- Developed a multi-community chat system using SignalR, enabling real-time group discussions, trade alerts, and direct communication among users.
- Focused on scalability, responsiveness, and seamless UX across investment communities and content modules.
- Contributed to secure, scalable subscription and payment flows tailored for community-based monetization.

BioNafitha

Healthcare E-Commerce Platform

- Engineered a comprehensive administrative dashboard to centralize inventory management, providing real-time visibility into stock levels and automated restock alerts.
- Developed robust data visualization modules for tracking sales performance, enabling stakeholders to analyze revenue trends through interactive charts and filtered reports.
- Implemented real-time sales analytics, product upload tools, and multi-option payment integration.
- Built a reusable component architecture for tables, filters, and forms, significantly reducing development time for additional management modules.
- Optimized client-side state management to handle large datasets efficiently, maintaining smooth UI performance during high-volume inventory searches and filtering.

EDUCATION

National Open University of Nigeria

Lagos, Nigeria

B.Sc. Mass Communication (Film Production)
